

PARTNERSHIPS

A straightforward program to maximize value to your clients.

Built for Service Providers to High-Risk Industries

If you work with facilities managing OSHA PSM, RMP, MOC, or contractor safety programs and those facilities are running on spreadsheets or disconnected tools, this is a conversation worth having. Frontline is the platform built to sit alongside the work you are already doing.

Your consulting work builds the program | Frontline makes sure it actually gets used:

- ➔ You make the introduction and we take it from there. No pressure on you to sell software.
- ➔ Your clients get a dedicated onboarding experience, not just a login and a help doc.
- ➔ Co-branded materials, ready to use. Pitch decks, email templates, and joint positioning built around your practice.

Your Services

Audits, assessments, training, compliance, advisory, and EHS program design

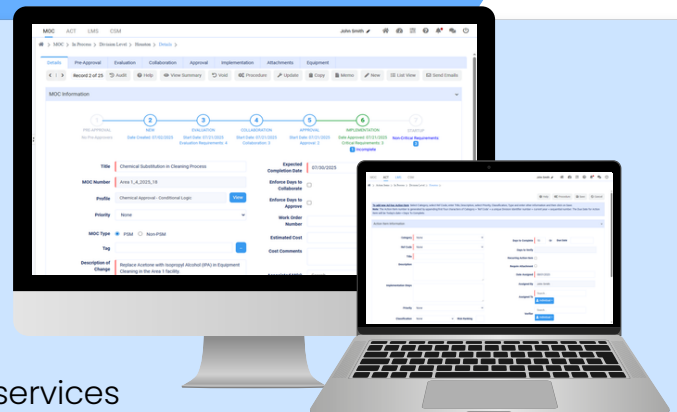

Our Software

Automate, manage, and enforce your processes with an easy-to-use platform

We're Better Together

- Faster adoption + consistency in the field
- Stronger audit defensibility
- Shorter corrective-action cycle times
- Less admin burden for your clients
- More opportunities to guide ongoing data-driven services

- 1 You submit the opportunity.
- 2 We lock it in.
- 3 We handle the Sale.
- 4 You get paid.
